

**SUPER**<sup>®</sup>  
LESS PLASTIC

September 24, 2021

To whom it may concern,

I have had the pleasure to work with Clémence de la Bretonnerie from March through September 2021.

During this time she became an invaluable team member, demonstrating great ability to execute complex projects with a data-driven mindset geared towards positive impact.

Clémence has shown a strong interest in sustainability and social impact since she joined SUPER as a volunteer, driven by a genuine desire to help others.

Over time, she demonstrated great leadership skills by spearheading various initiatives including optimizing our internal processes, driving intricate projects and delivering insightful analysis. All this enabled our team to make better decisions.

Clémence is a creative thinker and shows great problem-solving skills. She doesn't hesitate to go beyond her domain area to make insightful suggestions that benefit the whole team.

Clémence's determination, skillset, past experience and cross-cultural profile would make her a great asset to any team and organization, and I highly recommend her.

Do not hesitate to contact me if you have any questions.
